

Reservoir Tanks

Reservoirs are used to feed bulk fluids to a valve or dispensing. A variety of sizes (0.5 ltr. to 200 lt. as per customer requirement) and types is available, including bottom porting for very high viscosity liquids and top porting for low to medium viscosities. An "open top" style is used if liners are required to prevent the material from making contact with the sides of the container or if the fluid requires an agitator

Company's Product List

Single Component Dispensing Machines

- Liquid Glue Dispenser
- Grease Dispensing Machine
- Rotary Table Dispensing Machines
- Anaerobic Adhesive Dispensing Machine
- Reservoir Tanks
- Oil Filling Machine
- Dispensing valve
- Digital Alfa Dispenser
- Rotary Tube Dispenser

Two Component Dispensing Machines

- Fix Ratio Piston Type Metering
- Variable Ratio Gear Type Metering

Special Purpose for Dispensing & Coating Machines

- Rotary Table Dispensing Machines
- Oil Dispensing and Filling Machine
- Front Fork Oil Filling Machine
- Fasteners & Screws Coating Machine
- Epoxy Insulating Powder and Paint Coating Machine
- Belt and Roller Conveyors
- Liquids Mixing Systems
- Drum Mixing Systems
- Vacuum Sealing Machine
- Vacuum Chamber
- Heating Oven
- Heating Conveyor Oven
- Electronics Testing Equipments
- Pneumatic Press for Number Punching
- Laser and Inkjet Printing Belt Conveyors
- Multi Head Drilling and Tapping Machine
- Aluminum Extruded Assembly and Works Tables
- Chamfering Machine
- Automatic Drilling Machine
- Tapping Machine
- Oil spraying Machine
